Buggy Cars Test Approach

Assumption:

- Release cycle is every sprint
- Every sprint is two weeks

Test Approach:

- All the below test levels should be followed and each test levels would have entry and exit criteria.
- Regression tests to be executed during every iteration before release in preprod/integration env.
- Tests should be automated as a part same ticket or can be automated in the subsequent sprint based on the stability of the feature and criticality of the feature.

Testing levels:

- Unit testing
- Functional testing (System and Integration)
- Regression testing

Automation Testing:

- Smoke tests (Every time the build is promoted to higher env)
- Regression test (Every day / during every release cycle)

Bug Report

Defect ID: 1

Defect Title: Username field watermark incorrect

Defect Desc: Incorrect watermark on the Username text field on main landing page. This might confuse the users.
